Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by newly cited Dopheide et al.

Art Unit: 1651

Claims are drawn to product and composition wherein the product is an excretory-secretory product from *Necator americanus* and is less than 12 kDa. The composition comprises the product and a carrier and the product is less than 12 kDa.

Dopheide et al teach a first embodiment wherein an excretory/secretory product is derived from (see column 6, lines 45-47 and column 7, line 3) *Necator americanus*. The product is further disclosed to be less than 12 kDa wherein at column 6, line 58 the molecular weight for the product is 11 kDa. Further, at column 9, lines 29-38, there is disclosed a fourteenth embodiment which discloses a composition comprising the product and a carrier and/or diluent, see column 9, line 35.

The claims are identical to the cited disclosure and are therefore, considered to be clearly anticipated by the teachings of this cited reference.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892. Therefore, the claims are properly rejected.

No claims are allowed.
